

WHO DO WE WORK WITH?

Our clients come from a variety of organizations with different goals, requirements, and needs. Examples of some of our clients include environmental firms, community-based organizations, and small businesses.

We are enthusiastic to be part of the energy required to achieve our clients' objectives.

ABOUT GREEN MOON SOLUTIONS

We are a unique team of professionals who have joined together to work with small businesses, non-profits, and socially responsible organizations.

We apply our experience gained from working in large multinational consulting firms, research organizations, and commercial endeavors to provide expertise, skills, tools, and counsel to help organizations excel.

GREEN MOON

SOLUTIONS™

Helping your organization improve its efficiency to achieve your mission more effectively.

Our goal is simple: to help you do what you do more efficiently and cost-effectively.

BRINGING SOLUTIONS TO YOU

These rapidly changing times offer endless challenges and opportunities. Our team's shared philosophy is to combine our key capabilities to help achieve things that really matter.

The introduction and proliferation of enhanced technologies, a fast-paced workplace, and information overload have made it necessary for organizations to reach out beyond their core staff to get the work done.

Our goal is to help you do what you do more efficiently and cost-effectively.

EXAMPLES OF OUR SERVICES

Our goal is to provide expertise and tools to help you more efficiently reach your goals. We can help you run your organization more efficiently in several ways:

- We develop tools (spreadsheets, databases, Web pages, analyses) customized to your needs and procedures.
- We train you and your staff to use tools (developed by us, by others, or off-the-shelf) that will provide the greatest benefit to you.
- We "Web enable" tools and processes for you to make them accessible to your staff, clients, and members worldwide.
- We act as your back office staff by conducting periodic financial analyses, developing marketing materials, and managing databases — freeing your time up to handle higher priority challenges.
- We conduct research and analyses that can help you prioritize investments in technologies, resources, or procedures to reduce costs and increase productivity.
- We provide advice and recommendations that improve your productivity.

TOOLS

Tools were meant to make our lives easier. We will build or find the tools to fit your needs.

We believe in harnessing the power of information technologies, including the Internet, to provide efficient, effective means for communication, transferring information, collecting data, and conducting business.

- **Tools:** Tools we develop can be local to your computer, used across your network, or hosted on the Web, enabling you to access them from anywhere and share them with colleagues, clients, and members.
- **E-commerce:** We provide *secure* transactions with reputable credit card processing services. We can host online transaction forms on our site or develop them for your site. We can manage your transaction database or provide data to you in the format that you use.
- **Surveys:** We conduct online surveys, process the responses, analyze the statistics, and provide you with an analytical report.
- **Documentation/Publications:** Our products, reports, and documentation can be provided to you in a variety of printed, electronic, or Internet-ready formats.
